

3D ULTRASOUND

Seeing your unborn baby for the first time is the moment of a lifetime!. A 3D Ultrasound performed at 26-30 weeks gestation captures these memorable images and provides a more “life-like” view of your baby.

By having a keepsake 3D ultrasound you will be able to begin the bonding process with your baby even sooner. Your family will also be able to share in this first peek at your new baby.

Kansas City Women's Clinic utilizes leading edge technology with proven High Definition Imaging to provide superb 3D image quality in real time enabling you to see your baby!

20 Minute Appointment
CD
2 Black & White Photos
\$125.00

Occasionally, babies do not cooperate and we are not able to obtain images. In these cases, a \$25.00 sitting fee will apply.

As with all of our services, you may pay with cash, Master Card, Visa, or Discover.

A diagnostic ultrasound is required prior to performing 3D ultrasound and you will be asked to sign a release.
